Issue One

- Should display overview.html (a table) on initial opening.
- Wrong behavior:
  - Have to Click overview
  - Menu's disappeared

Issue Two

Name		Value	
DeviceName		i2cgate1	
IpAddress		192.168.1.90	

- The table should be in a container – ie the bar is too long.
- Nice to have a way of stacking multiple tables in multiple containers (A future overview, could have multiple tables)

Things to check

- Can switch between two tables
